Course Description:

This is an introductory course to world religions. Since it is an extensive subject, we will be focusing on some of the major religions of our world, examining them from its historical, sociological, anthropological, psychological, and ritualistic practices. Furthermore, we will also learn about religions that are no longer in practice and had influenced some of today’s religions. We will analyze the differences and similarities between religions and associate their practices, beliefs, and applications to contemporary issues in our world.

We will use different techniques as a way of learning in this class, such as debates, lectures, personal assignments, videos, and group assignments.

Course Objectives:

By the end of this course students will be able to:

- Define and discuss basic religious terminology.
- Learn and apply critical thinking skills in the context of religion.
- Appreciate the history, basic teachings, practices, and underlying beliefs and principles of some of the world religions, analyzing them in a critical way and understanding their similitudes and differences.
- Understand what the religious phenomena and religious experience are by utilizing different approaches and theories of religion in order to present a critical analysis.
- Become more aware and understanding of the diversity of religious beliefs in our society and its effects on contemporary and every-day events.
• Challenge his/her own misconceptions of what religion and its practices are and open his/her mind to new ideas.

For this project students will have to choose a topic, concept, ritual, myth, or custom practice in two different religions and compare and contrast them. For example, you can compare and contrast the Inca’s myth of creation with the creation myth of the Bible. You will have to use scholarly sources for this assignment. A research session at the library will be set up so each student will learn how to use the resources we have at the university. I do not consider WIKIPIDIA a source nor internet websites.
