Course Description
This course draws from religious, philosophical, and scientific sources in order to examine planetary environmental problems. Environmental Philosophy and Ethics, as well as the emerging field of Religion and Ecology have developed over the past 50-60 years in an attempt to address problematic human-earth relations. However, underlying many of these approaches is a very western understanding of “nature” as pristine, pure and without human presence. The reductive and productive model of science, for instance, has attempted to define all non-human nature as “dead” stuff and thereby as resource for human use. Historically, some religious worldviews have understood nature as either a pristine creation for which humans ought to be good stewards, or as evil material that must be controlled and eventually escaped. Finally, some thinkers have argued that culture and technology are the culprits of ecological and social ills, and human beings ought to return to a paradisiacal relationship with nature.

Might these very static notions of nature, as pristine source of salvation, as mere resource for human beings, or as chaotic source of evil, exacerbate planetary ills? This is precisely what some political, post-modern, and post-colonial scholars have suggested. Nature, from this perspective should be thought of in the plural and not as something separate from “culture.” The very attempt to define nature and globalize that understanding of nature leads to social oppressions (think about what is coded as “natural” or “unnatural”) and ecological ills (through removing humans from their ecological and often urban contexts). This course will explore the effects of globalizing understandings of “nature” and “religion.” The hypothesis of the course is that both religion

¹Syllabus is subject to change. Required purchased texts, course requirements, and course time will not change, but some of the reading materials may, depending on events that happen throughout the semester.
(culture) and science (nature) have served as apolitical foundations for forcing truth claims upon “others” both humans and “more than humans.” In response to this, this course will explore what a “planetary” understanding and ethic (Spivak) of the world as opposed to that of the global might look like. In other words, how might we begin to think and act as if we are part of a planetary community rather than separate from or an exception to the rest of the natural world?

Aim Of The Course
To explore the philosophical and religious sources and forms for the processes known as “globalization” as they pertain to the human and non-human community, and to discern an appropriate, non-colonizing environmental ethic in a world that has multiple meanings of “nature” and what is “natural.”

Global Learning Outcomes
In this course: a) Students will be able to identify interrelationships between religious ideas and the ways we interact with other animals and the rest of the natural world; b) Students will be able to identify specific, global environmental challenges and analyze them from multiple perspectives; c) Based on their awareness of how their own life-choices affect global environmental issues, students will be able to describe possible solutions that work toward global health.

Writing Across The Curriculum Outcomes
This course is intended to help students become better writers. In particular, this course is aimed at helping students “write to learn.” Writing to learn involves developing one’s critical thinking, reasoning, and argument skills through writing. As such, students will write three short, interconnected essays and work in peer-review groups to evaluate the essays. After the peer-review of each essay, students will have the opportunity to revise each essay according to the peer evaluations. All writing requirements will be assessed by rubrics handed out on the first day of class.

Requirements (See Due Dates in the Course Schedule Below)
Recognizing that there are many different learning styles, these requirements are designed to provide you with a variety of ways in which you can demonstrate your engagement with the materials in the course.

1. Class Participation/Quizzes—30%
The first step to doing well in this class is to show up! You can’t be a part of the learning community if you are not present. If you have to be absent from the course, please notify me ahead of time. Any more than two absences (unless there are extenuating circumstances) will result in a lowering of your participation grade. One absence is a free- bee. The second you must give me an excuse for.

    The second step to doing well in the class is to speak up during course discussions. This means you must read materials and attend lectures! I realize that we all exist on a spectrum between introversion and extroversion, but remember that the classroom is as good as all of the voices therein. We all lose if we don’t hear your voice at some point(s) throughout the semester. (Just attending all sessions and participating gets you 10%.)

    The classroom is a community of learners. That is, we are all in the process of critically engaging the lectures and course materials together. Learning should be a collaborative process and
it will take all of us to learn this semester. Having said that, there are some ground rules that should be followed in course discussions and assignments.

1. Confidentiality: Sometimes we are exploring serious issues in the course that may be hard to speak about or give voice too. I expect that students will respect one another’s privacy in this course and allow room for this type of exploration.

2. Trust and Respect: The classroom is a learning community and it is only as good as the relationships of the people that make up the classroom. Give your classmates the benefit of the doubt before jumping to conclusions about what is said. Also, be sure to state your opinions, questions, ideas and beliefs in a way that is not intentionally disrespectful to others in the class. While freedom of expression, and challenging assumptions is encouraged in this classroom, hate speech will not be tolerated.

3. Academic Honesty. In all written materials, students will be expected to cite sources. Plagiarizing and “Copying” from other students will result in a failing grade. Grading for written assignments will follow the Rubric that is handed out on the first day.

4. Students should be aware of everyone in the classroom and enable each person to contribute to the conversation. Likewise, each participant should refrain from dominating class discussion.

5. In order to facilitate dialogue, on discussion days we may break out into small groups.

Interactive Canvas tools: In order to facilitate interaction with course materials (lectures and readings), I will provide you with reading questions, which we will discuss in class. Reviewing these questions will help you study for the quizzes. There may also be a few days in the semester when we will not meet “in person.” On those days, lectures and/or activities for the course will be available on Canvas.

Quizzes: The third component of class participation is course readings! It is important that you engage with the texts of the course! A quiz will be given every three-ish weeks on the readings and lectures for the given weeks; these will be delivered on the blackboard site and will be open on a Thursday and stay open until Tuesday. They will make up 20% of the grade.

2. Ecological Footprint Essays (WAC Assignment): 57% of the grade
Each student is expected to write three “ecological footprint” essays. These essays will be distinct, but will build upon one another. A completed draft will be peer-reviewed in groups, in class. After each peer review, students will resubmit the final essay. The peer-review process is part of this requirement! You must turn in your peer-review rubrics (at least 1 for each essay) along with the final essay (by the time of the next class session following the submission of a final essay). These will count for 10% of the grade for each essay. Do not, I repeat, do not pretend to do a peer-review of your own essay, I will be able to tell and you will get a lower grade. Your peer review group will be the same as your reading group. The peer-review rubrics will be available on the course Canvas site. Each essay should be 1000-1200 words, typed, double-spaced, 12-point font. For each section, you should cite information using parenthetical citations, include a “works cited” page at the end of each essay. Any type of plagiarism will not be tolerated. Each essay should contain AT LEAST (though you may have more) once citation from a book, one citation from an article (academic, newspaper, or magazine), and one citation from a reputable online source. Remember not all sources are equally reputable and there is a lot of false information out there. Part of this assignment is to help you sift through information and discern what sources are reputable. A good way to do this is to check claims with multiple, scholarly sources. In terms of online sources,
remember there is a difference between .edu, .org, .net, and .com addresses. When you are citing a source online, be sure to figure out what type of organization is making a claim and why.

Students must make an appointment with a Writing Center tutor for the first essay. **You will have to turn in some sort of proof that you went to the writing center for this first essay, which they can provide you with (usually a stamp on your paper).** It is strongly recommended that you make an appointment early, and take your first essay along to that appointment; some students may also choose to go to the Writing Center between the due date of the first draft of the first essay and the due date of the revised, final first essay. **Attending a writing center session will account for 20% of grade of the first essay.**

A. Go online and complete the Ecological Footprint. ([http://www.footprintnetwork.org/en/index.php/GFN/page/personal_footprint](http://www.footprintnetwork.org/en/index.php/GFN/page/personal_footprint)). Write a reflection about your results in your journal including addressing the complex question, “what is sustainability?” **Be sure to read Grounding Religion, ch 14 for your reflections on this journal!** Offer your own reflections about whether or not humans are responsible for living within the ecosystems of planet earth. Finally, offer your reflections on what you might be able to “do” given the results of your ecological footprint. This is a “writing to learn” assignment meant to help you understand the complex issues surrounding the concept of sustainability and how your own habits relate to sustainability.

B. Monitor your food consumption for a day. Write down everything you eat, including the ingredients, and try to find out: a) where the food came from and how much it had to travel to get to you, b) how the people in farms/factories were treated in the making of the food product (this one may not be possible in all cases, but do your best), c) how the crops and animals that make up your food were grown / raised (organically? With pesticides? In factory farms? Small farms? Etc.) After completing these three steps, reflect on ways that these issues tie into your own ecological footprint from the first assignment. This is a “writing to learn” exercise that is meant to help you explore how your daily food habits have global implications; it is meant to introduce you into the issues of food, globalization, and the environment.

C. Council of All Beings Journal. First, Read The Council of All Beings (which will be given to you). The Council of All Beings, developed by thinker Joanna Macy, is an exercise in which you take on the avatar of another organism or system in nature, and then through that organism or system, you tell the human community how it experiences the actions of human beings. This is meant to help us understand that the earth is a planetary community and that there are many perspectives outside of the human. For this journal, choose an animal, plant, or system (dolphins, the ocean, the everglades, alligators, polar bears, the climate, etc.) Based upon your ecological footprint and food journals, describe how current human technologies and lifestyles are affecting that animal, plant, organism or system (you might need to do a little outside research to determine this). Based upon your findings throughout the course, what are some technologies, attitudes, and or life-changes that could be made to help foster the flourishing of your animal, plant, organism, or system? This is a “writing to explain” task and is meant to help you use conceptual tools to analyze and think about solutions to some of the problems that emerge in around the issues of religion, nature, and globalization.

3. **Final Video: 13% of the Grade.** Students will work in groups of no more than 5 to create a 1.5-minute (no longer) final video on the theme of your Council of All Beings journal. Given what we have discussed throughout the course, and what you know about the problems of climate change
facing south Florida, and the current, human caused, mass extinction, what would your animal, species, plant, or entity say to the human community? What does a “good planetary future” look like from the perspective of your species. These should be imaginative and creative! (NB: Don’t just narrate a power point, and don’t just splice together clips from someone else’s talking head on the Internet). You can, for example, create a commercial with your 5 representative entities, animals or plants; or, you can have a court case against humans or a particular corporation; or, you could create a video from beyond the grave with your animals, plants, or entities telling humans what they could have done to save you. These are just examples, but get creative with them. These will be posted on our course Blackboard site, and we will watch them and comment on them by the time of our final exam (online).

If you need it, you can check out Video Recording Equipment from FIU in GL 177. They will also instruct you on how to use the equipment if you are not familiar. If you need help with the editing process you can make an appointment with Academic Video Services in GL 150. You can also find out information about these resources online: http://libguides.fiu.edu/filmandtv/videoproduction.

Plagiarism Policy
This course adheres strictly to FIU’s plagiarism policy:

This Policy views plagiarism as one form of academic misconduct, and adopts the definition of the university’s Code of Academic Integrity, according to which plagiarism is:

the deliberate use and appropriation of another’s works without any indication of the source and the representation of such work as the student’s own. Any student who fails to give credit for the ideas, expressions or materials taken from another source, including internet sources, is guilty of plagiarism.

Examples of plagiarism include, but are not limited to:

1. Term papers acquired online or from other sources;
2. Copying of original material without attribution;
3. Use of other students’ work;
4. Copying and pasting, verbatim, information from Internet sources, without quotation marks and correct citation.

Plagiarism will result in a failing grade for the course and a referral to the College of Arts and Sciences Dean of Students for academic misconduct.

April 22 (1970): First Earth Day
April 26 (1986): Chernobyl Disaster
June 4 (1892): Sierra Club formed with John Muir as President
July 4 (1845): Thoreau moves to Walden Pond
August 2 (1978): Lois Gibbs begins movement at Love Canal
Course Schedule

Conceptual Introductions

Week 1: August 27/29: Introduction to Course: Sources for Environmental Ethics. Overview of Syllabus and Requirements (This will be Online)

T: Discussion of Syllabus
Th: Prepare your reflections on the Lynn White Reading and the *Grounding Religion* and Sandler chapters to bring to class; using the “reading chart” available on our course Canvas page to help map out the relevant information of the text.

READINGS: Lynn White reading (online); *Grounding Religion*, “Introduction”; Sandler, chapter 1.

Week 2: September 3/5 What is Religion? What is Nature?
T: Lecture.
Th: Opening Reading discussion on Intro. (form discussion groups)

READINGS: *Grounding Religion*, Chs. 1-2; Sandler, chapter 2.

Week 3: September 10/12 What is Nature? What is Religion?
T: Lecture
Th: Reading Discussion (answer questions online; no in person class)

READINGS: *Grounding Religion*, Chs. 3-4; Sandler, chapters 3-4.

Historical Overviews: Religion, Nature, and Cosmologies

Week 4: September 17/19
T: Film Reflection: “The Use and Abuse of Vegetational Concepts” (watch online; submit one-page reflection)
Th: Reading discussion (answer questions online; no in person class)

READINGS: *Grounding Religion*, Ch. 12; Online: Selections from David Noble, *The Religion of Technology*, Chs. 1 and 2 (online).

Online Quiz 1: Weeks 1-4
(Open from Thursday after class until the following Tuesday at class time)

Week 5: September 24/26 Religion and Nature: The Ancient Near East, Greece and Proto-Forms of Modern Western Science
T: Lecture
Th: Reading Discussions
READINGS: Online: Selections from: “Genesis”, “Aristotle”; Selections from the *Enuma Elish* (online); Merchant, *Reinventing Eden* (online).

Week 6: October 1/3: Religion and Nature: Islamic Thought and the Scientific “Revolution”:
Shifting Paradigms
  T: Lecture (turn in Journal 1 draft on Canvas; share copy with your peer-review team by email)

  Th: Reading Discussion (peer reviews completed and turned into class mates)

  **Draft Journal 1 Due, October 1 (Canvas)**

READINGS: Selection from Ahmad Dallal, *Islam, Science and the Challenge of History* (online); Merchant, *Death of Nature* chapters 5 and 7 (online).

Week 7: October 8/10 Colonization of land, animals and “others”

  T: Lecture; First Journal due on Canvas!
  Th: Reading Discussion

READINGS: Sandler, chapters 5-6; Roxanne Dunbar-Ortiz, *An Indigenous Peoples’ History of the United States*, Chs. 1 and 2 (online).

  **Journal 1 Final Draft Due, October 8 (Turn it In):**
  Be sure to read *Grounding Religion*, ch 14 for your reflections on this journal!
  Don’t forget to bring peer evaluations to turn in in class

  **Online Quiz 2: Weeks 5-7**
  (Opens from Thursday after class until the following Tuesday at class time)

**Topics in Religion and Ecology / Nature**

Week 8: October 15/17 The Romantic “Return”

  T: Lecture
  Th: Reading Discussions

READINGS: *Grounding Religion*, Ch. 7. Sandler, chs. 11-12.
Week 9: October 22/24 Globalization and its Discontents  
T: Lecture  
Th: Reading discussions (turn in peer reviews to peers)  

READINGS: *Grounding Religion*, Ch. 8, 15; Ruether, 1-44 (online).

Week 10: October 29/31 Religion, Gender, Sexuality and Nature  
T: Lecture: (turn in draft journal 2; share with peer-review team)  
Th: Reading discussions (turn in reviewed drafts to peers)  

**Draft Journal 2 Due, October 29 (Canvas)**  

READINGS: *Grounding Religion*, Ch. 5; Sandler chapter 14.

Week 11: November 12/14 Food and Agriculture  
T: Lecture (revised journal 2 due)  
Th: Reading Discussion  

*Revised Journal 2 Due (Turn it In); November 12th;  
don’t forget to bring peer evaluations to turn in in class*  

**Online Reading Quiz 3: Week 8-11**

Week 12: November 19/21 Environmental Justice  
T: Lecture  
Th: Reading Discussion  

READINGS: *Grounding Religion*, Chs. 6 & 13; Sandler, chapter 15.

Week 13: November 26/28 Global Climate Change  
T: Lecture  
Th: Reading Discussions  

READINGS: *Grounding Religion*, Ch 9; *Climate Literacy (online)*; Sandler, chapter 16.  

**No Class due to Thanksgiving on November 28**

Week 14: December 3/5 The Planetary Future  
T: Final Lecture (draft journal 3 due for peer review)  
Th: Class readings from week 13/14. (peer reviewed journals back to peers) (turn in peer reviews to professor as well); course wrap up.  

READINGS: *Grounding*, chapter 16; Sandler, chapter 17; *Bauman and O'Brien (online)*
Draft Journal 3 due (online) December 3rd.

Final Online Quiz 4: Weeks 12-15
(open from Thursday the 5th until Tuesday the 10th).

**Week 15:** December 10/12: Finals Week no in person class

Final Journal 3 due (Turn it In); November 10th.

Final Video Projects are due during our final scheduled time; each of you should watch these and comment on them online. Your comments and the videos will all be factored in to the final grade.
